Fireside Book # 8081

Four year old Shari Ward

saw life and death as a simple process. She explained it to her father as they watched a snake shed its skin. *"Oh, I get it,"* she said. *"It's like when people die."* *"What do you mean, honey?"* her puzzled father asked.

"When you die," she explained, with an air of authority, *"you get rid of your old skin then come back to life all over again. You're brand new--just like the snake."*

"Why do you say that, sweetheart?"

"That's what I did, and my other mommy did, too."

Throughout Shari's lifetime she has experienced dreams and remembered happenings, often under hypnosis, from what she believes to be her past lives. These served to reinforce her childhood belief--or was it really a memory?

Beyond Forever is not a biography. It is a novel, but much of the novel is based on true memories and dreams that cannot be easily explained away. Its main purpose is to entertain, and to some extent, inform the reader and to make some readers ask, *"Have I ever lived before?"*
